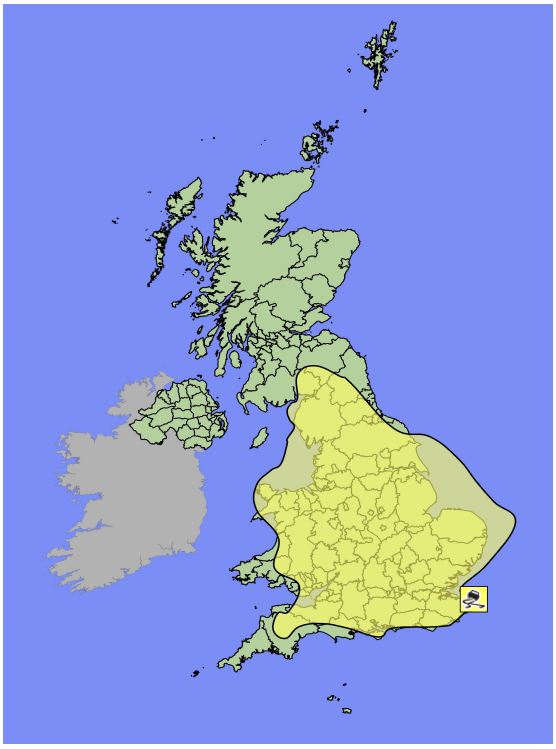
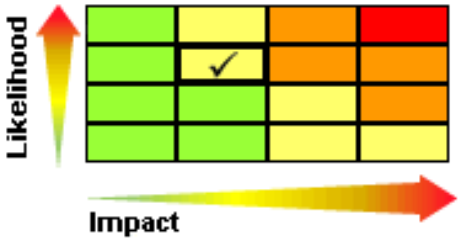
National Severe Weather Warning Service





Chief Forecasters Assessment
The wintry weather will continue through the weekend, albeit in a less severe form. The continuing low temperatures will mean that lying snow will remain, and ice will become a problem, both where snow partly melts, or in the southwest of England and Wales, where heavier rain fell early on Friday

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Sat, 19th Jan 2013** until **11:00 on Sun, 20th Jan 2013**

Although some further slight snowfalls are likely, with 1 to 2 cm of fresh snow in a few places, the focus switches to ice, with sub-zero temperatures persisting over existing snow cover for many areas and spreading back into parts of the southwest towards daybreak on Saturday.

The public should be aware of the risk of localised disruption to transport during this spell of wintry weather.
